

ADVANTAGES

- Easy 360° capture hood positioning
- Supports a healthy and clean work environment
- Plug & play solution
- Portable cleaner for airborne dust and fumes
- 2-stage filtration
- Roll-out dust drawer

Application	The mobile dust collector Zephyr Compact can be used for the extraction of light to medium dust loads and fumes from manual metalworking processes like welding or grinding.
Installation Options	Mobile dust extraction units are the most flexible and effective way to clean up your workshop environment, especially with changing workplaces.
Comment	The mobile dust extraction unit Zephyr Compact is suitable for sporadic usage, short shifts or repairs in a maintenance department as they exist in almost every company.
